Microsoft Online Exchange Services

Benefits

- Reduce up-front capital investment and free up administrator time to focus on other projects.
- Assist with internal policy enforcement and respond quickly to e-discovery requests.
- Help employees stay productive by providing backup e-mail systems for rapid disaster recovery.
- Help satisfy external requirements for e-mail retention and monitoring.
- Drive down bandwidth costs by helping to eliminate threats before they reach the corporate firewall.
- Get in-depth defense with multiple real-time anti-spam and antivirus features.

Features

- Exchange Hosted Filtering
- Exchange Hosted Archive
- Exchange Hosted Continuity
- Exchange Hosted Encryption

Exchange Maintenance Free!
 Microsoft delivers a service that manages and maintains your company's email boxes for as little as \$11 per month per employee.

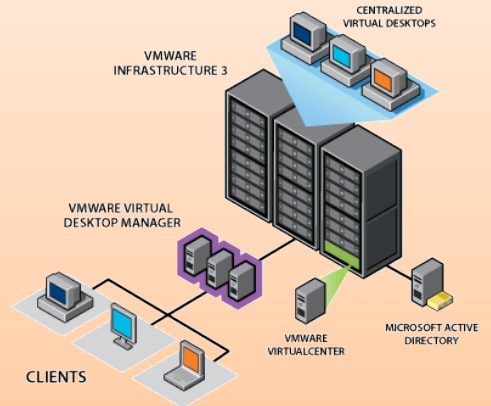

VDI : An Integrated Desktop Virtualization Solutions

End-to-end Virtual Desktop Infrastructure Functionality

- Central administration of desktops from any location
- Scalable management
- Streamlined provisioning
- Desktop isolation

Simplified Desktop Management & Secure Provisioning with VDM

- Desktop management
- Flexible provisioning
- Strong network security
- Complete integration with Microsoft Active Directory

VDI ROI:
 "While we invested an additional A\$200,000 or so in upgraded storage, we saved about A\$500,000 in combined storage and server hardware we would have had to purchase had we not implemented VMware."
 — Stephen Beckwith, Infrastructure Manager
